RELEVANT EXPERIENCE

THE HOME DEPOT — **Atlanta, GA | Remote**
Data Scientist – Supply Chain — August 2024 – Present

- Built and productionized ML-powered container forecasting system using time series and regression models, deployed via Vertex AI pipelines for weekly org-wide reporting — **Orange Spotlight Award Winner 2025 1H, saving ~$15MM annually.**
- Automated wave planning tool with improvements for seamless usage, stakeholder support, and troubleshooting.
- Niagara Optimization: Building cost-optimized ordering between TL4, TL3, and SDC Direct with Niagara vendor, delivering savings across all non-syn vendors.
- Built Import Chatbot for stakeholders to ask quick questions, generate reports, and access analytics on demand — reducing ad-hoc query requests to the data team.

THE HOME DEPOT — **Atlanta, GA | Remote**
Senior Analyst – Quantitative Research (RM+) — February 2023 – Present

- Developing a dynamic pre-campaign pricing prediction service from scratch utilizing machine learning algorithms to optimize pricing for marketing advertisement campaigns.
- Engineered ETL and ML pipelines using Vertex AI and Kubeflow architecture for multi-source data integration, feature engineering to identify key predictors, and built a predictive service to estimate pre-flight campaign performance KPIs.
- Drove business collaborations with stakeholders and presented valuable business intelligence to leadership to enable strategic decision-making for customer success.

MUTUAL OF OMAHA INSURANCE COMPANY — **Atlanta, GA | Remote**
Associate Data Scientist — August 2022 – February 2023

- Designed and developed marketing analytics models, increasing solicitation email campaign responses by 18% through innovative media mix marketing strategies.
- Deployed solution in AWS SageMaker to enable real-time prediction of CTR, enhancing performance by 11%.

Data Science Intern — April 2022 – August 2022

- Developed a workload analysis model predicting claim processing time with 83% accuracy, integrating stakeholder inputs and historical data.
- Executed algorithms and deep learning frameworks, achieving 77% accuracy on the final classification model.

GEORGIA STATE UNIVERSITY — **Atlanta, GA**
Graduate Research Assistant – Data Scientist — August 2021 – May 2022

- Healthcare Sentiment Analysis Project: Conducted data mining and created metadata from multiple resources; performed text preprocessing and leveraged ML and deep learning models (BERT, GloVe) to predict sentiments of the US population during the COVID-19 pandemic.

BFOX TECHNOLOGIES PVT LTD — **Kerala, India**
Data Scientist — January 2018 – August 2020

- Developed machine learning models to optimize placements for marketing campaigns across channels.
- Analyzed results and derived business intelligence from A/B tests, increasing website traffic by 19%.

EDUCATION

Georgia State University, J. Mack Robinson College of Business — Atlanta, GA
Master of Science in Data Science and Analytics – December 2022

National Institute of Technology Calicut — Calicut, India
Bachelor of Technology in Electronics and Communication Engineering – May 2018

TECHNICAL SKILLS

Scripting Languages: Python (Sklearn, TensorFlow, A/B Testing, XGBoost, Matplotlib, Seaborn), SQL, R, C++, HTML, CSS

ML Stack: Google Cloud Platform, BigQuery, Vertex AI, Kubeflow, LightGBM, CPLEX, Jupyter, VS Code, Airflow, Kubernetes, Tableau, Git, Linux, CI/CD, Jira, APIs, OOP

Data Science: Predictive Modeling, A/B Testing, ETL, Statistics, Time Series Forecasting, Deep Learning, Natural Language Processing, Data Visualization, Supply Chain Optimization
